

Agile Kata Pro

Pattern to Increase Agility for Teams and Organizations

The Agile Kata is a universal pattern to improve agile processes, steer agile transformations, or to increase business agility. But it can also serve as your agile team process, providing an alternative to Scrum or Kanban. This course introduces you to a power tool for agile change management, increasing agility at a team and organizational level alike.

Thinking in Kata has been successfully applied for decades in lean manufacturing and is now gaining popularity among knowledge workers. The scientific thinking combined with deliberate practice creates an environment for continuous improvement, a constant desire to increase business agility, and to increase organizational performance overall.

The Agile Kata Pro courses addresses some of the most pressing challenges that organizations face today, for example leading agile transformations, increasing business agility, creating an agile culture, or finding new ways of working as an agile team.

TOPICS

- The Foundation of the Agile Kata
- Adding Agility to Kata
- Agile Kata for Agile Transformations
- Agile Kata for Agile Teams
- Business Agility with the Agile Kata
- Agile Kata to improve existing Team Processes

DELIVERY

The unique training can be delivered in-person, virtual or hybrid (in-person and virtual at the same time)

CERTIFICATION

All participants completing the Agile Kata Pro course will receive a password to attempt the Agile Kata Pro Level I (AKP I) assessment, which requires a minimum passing score for certification.

OBJECTIVES

- Understand and practice the basic pattern of the Agile Kata.
- Learn techniques that inject agility by using the Agile Kata.
- Recognize how the Agile Kata can be a universal tool for agile transformations.
- Apply the Agile Kata in common agile transformation scenarios.
- Learn how existing Agile/Scrum Teams can benefit from the Agile Kata.
- Perform the Agile Kata for product- and process improvements using a case study.
- Understand the role of an Agile Coach in the Agile Kata.
- Define a first step to increase business agility in your organization using the Agile Kata.

AUDIENCE

This introductory course is ideal for Agile Coaches, Scrum Masters, Leaders, Change Agents that work or lead agile teams or organizations to more agility. This course is also ideal for entire delivery teams that aim to use the Agile Kata to deliver products.
